

MODULES

Case notes

Who are we?

PatientSource is a cloud based EPR solution, created by clinicians, for clinicians. Our interoperable system plugs seamlessly in to your existing processes and moves paper medical records in to a digital hub, drastically reducing human error and improving patient care. What makes us different from other solutions I hear you ask? Our modular based approach to building EPR software and our innovative partnership programme allows us to build a solution that's totally bespoke to your needs.

What is the module?

The PatientSource case notes solution is a fully-auditable electronic notes platform that allows clinicians to search, analyse and annotate patient clinical notations. The comprehensive yet simple to use platform is purpose-built so that health and care professionals can quickly find the information they need, when they need it.

Benefits and Key Features

- Build digital templates to replace paper forms. Write text notes, sketch medical diagrams, take and annotate medical photos digitally
- Improve accountability and reduce errors and inefficiencies caused by illegible handwriting
- Search through entire clinical record histories in a fraction of a second
- Works in browser on any handheld device

“The PatientSource clinical noting module saves money, improves patient safety and makes staff more efficient...”

PatientSource
Patient care safely in one place

Case Notes

Page: 1

11:27 Thu 03-May-2018 **See & treat Minors** - Dr Phil Ashworth

Entered / imported 16:27 Tue 01-May-2018

PC:
1) Painful LEFT ankle

PCHx:

- Playing netball, stood on side of ball
- Foot inversion, some twisting, fell onto lat malleolus.
- Painful lat ankle, swelling, Denies paraesthesia
- Unable to WB on foot

PMHx:
- Childhood meningitis
- Appendicectomy

DHx:
- COCP
- NKDA

SHx:
- PhD student
- Non-smoker

O/E:

Cap of 2s, DP & PT present
Painful inversion & eversion. Fix/text ankle pain limited

Imp//
- 7# fib

Plan//

1. Analgesia
2. Foot XR + R/V

Dr Phil Ashworth
Emergency Dept Doctor - (11111)

11:57 Thu 03-May-2018 **R/V after XR** - Dr Phil Ashworth

Entered / imported 16:37 Tue 01-May-2018

Ankle XR:
- Minimally displaced Weber A # distal fib

Plan//

1. WB cast
2. D/C with analgesia + # clinic appt. Return SOS

Dr Phil Ashworth
Emergency Dept Doctor - (11111)

Why – Why should you care? Why go with PS?

Save time - An estimated 15% of clinical staff time is wasted looking for and handling paper notes

Save money - over £4,800,000-worth of staff time wasted at an average-sized NHS trust per annum

- **8,640** estimated cases of patients at risk of harm as a result of missing paper notes
- **4,896** repeat appointments required as a result of notes missing at the appointment
- **£528,768** estimated cost of additional appointments required as a result of missing paper notes

Save lives – missing documentation, skipped assessments, prescription errors and mis-calculated scores contribute to the 9% medical error rate for admissions in paper-based hospitals, saving you time and effort.

An Agile and Interoperable Solution

Because our solution is modular and cloud based, we provide the flexibility to fit straight in to your clinic or hospital either as a departmental system or a greenfield solution that replaces your paper-based processes. Implementation is easy, taking as little as four weeks to be up and running from inception. Interoperability is the future of digital healthcare, which is why it is at the centre of everything we do.

What are the next steps?

If you would like to see our Case Notes module working in action, or just want to know more about PatientSource, we would be happy to organise a short demo with one of our product specialists. If you are viewing this document online, you can contact us by clicking **HERE** or alternatively visit our website to contact us and a member of our team will be in touch.

25%
of all paper patient records contain human error
