

MODULES

Graphical Charting

Who are we?

PatientSource is a cloud based EPR solution, designed by clinicians, for clinicians. Our interoperable system plugs seamlessly in to your existing processes and moves paper medical records in to a digital hub, drastically reducing human error and improving patient care.

What is the module?

The Graphical Charting module allows data to be pulled from clinical records and displayed in graphs as a single-click, real-time dashboard.

Graphs can be displayed on a per-patient and a cross-patient basis. The data recorded within the charts and graphs can then be sliced and diced to give clinicians and manager exactly the view they want. Clinicians can see how their patients are progressing over time relative to the interventions given. This is of particular benefit to the patient in their journey of care, as it enables clinicians in situations where you have the same measurements being taken from a patient, on multiple occasions, to easily see what trends there are in that data and tailor care accordingly. Managers can analyse the impact of their healthcare services, identify bottlenecks and produce metrics for reporting.

Why – Why should you care? Why go with PS?

Save time - An estimated 15% of clinical staff time is wasted looking for and handling paper notes

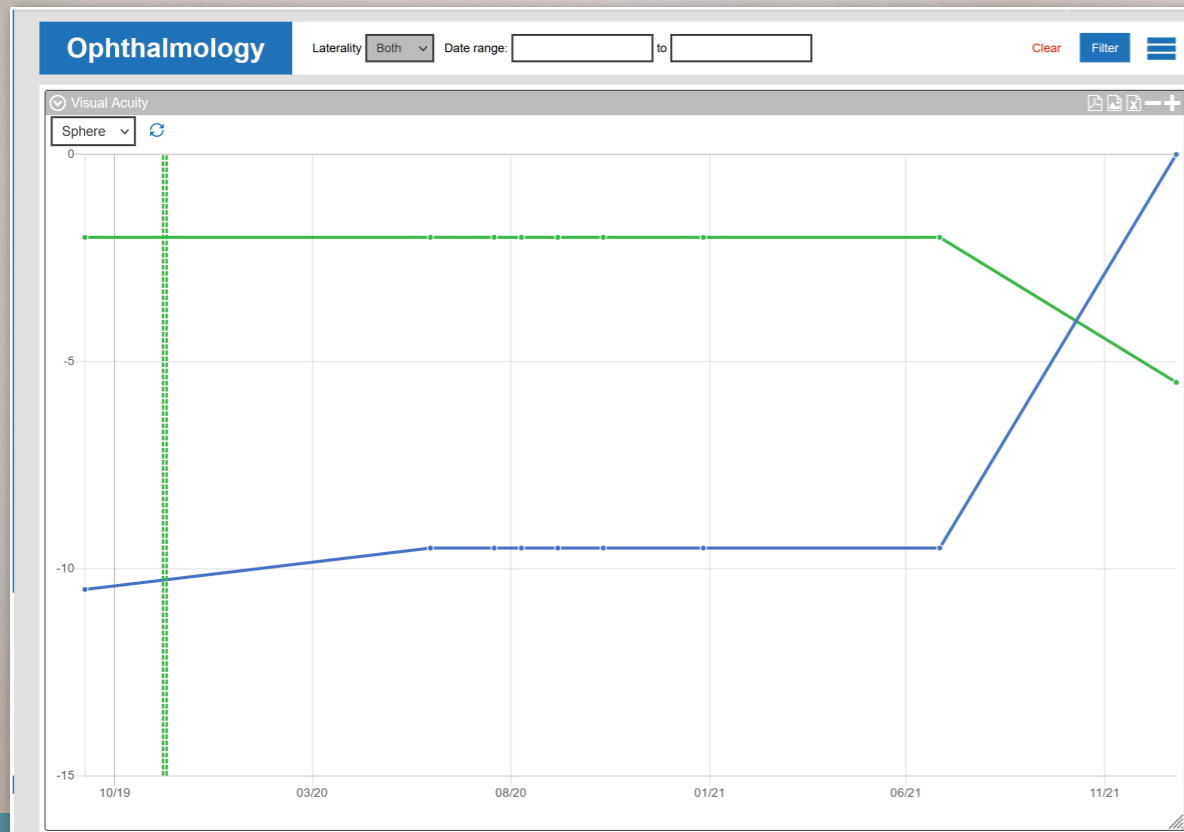

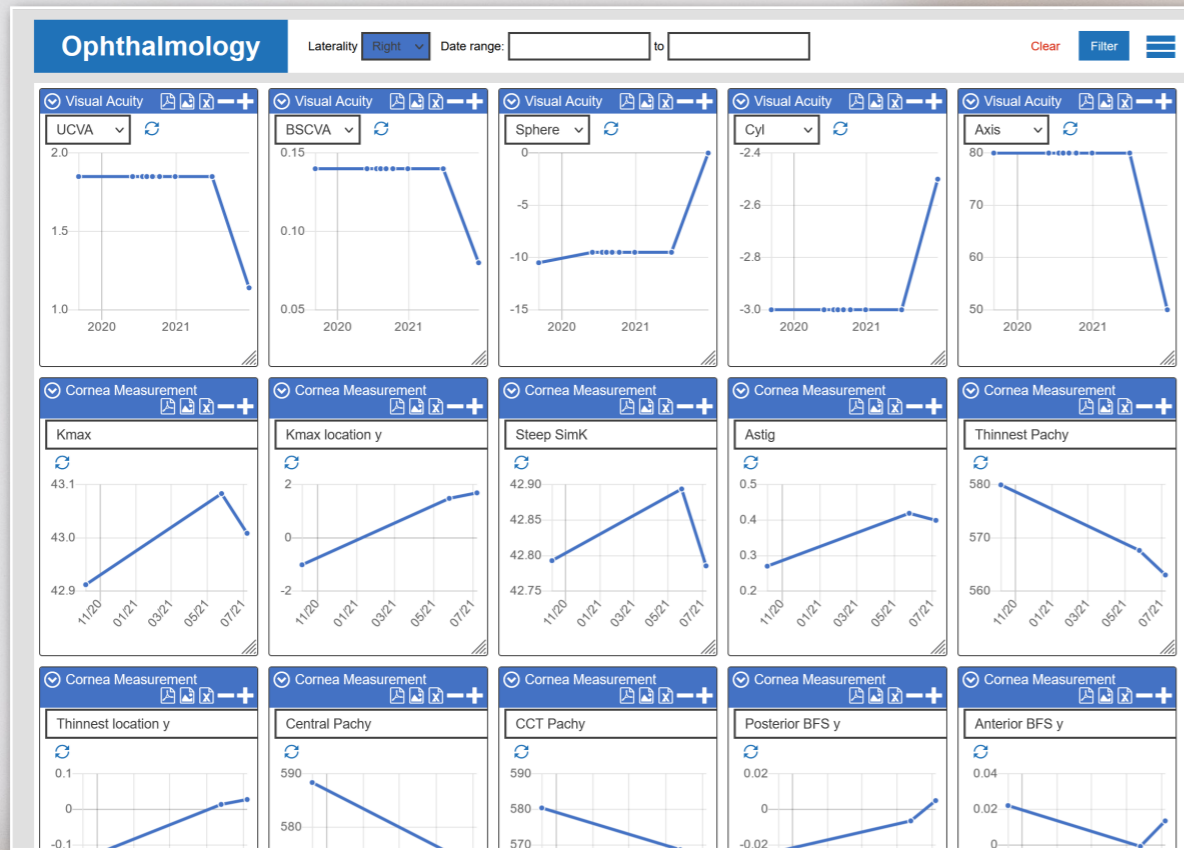

Save money - over £4,800,000-worth of staff time wasted at an average-sized NHS trust per annum

- **8,640** estimated cases of patients at risk of harm as a result of missing paper notes
- **4,896** repeat appointments required as a result of notes missing at the appointment
- **£528,768** estimated cost of additional appointments required as a result of missing paper notes

Save lives – missing documentation, skipped assessments, prescription errors and mis-calculated scores contribute to the 9% medical error rate for admissions in paper-based hospitals.

“Interoperability is the future of digital healthcare, which is why it is at the centre of everything we do.”

- ### Benefits and Key Features
- Highly customisable charts
 - Real-time view of patient data pulled from across the medical record
 - Unlimited number of dashboards and charts configured
 - Interactive graphs with drill-down capability
 - Filterable by date/episode/laterality/measurement/result type
 - Zoom in/out functionality
 - Medical history / past procedures indicated on graphs

An Agile and Interoperable Solution

Because our solution is modular and cloud based, we provide the flexibility to fit straight in to your clinic or hospital either as a departmental system or a greenfield solution that replaces your paper based processes. Implementation is easy, taking as little as 4 weeks to be up and running from inception. Interoperability is the future of digital healthcare, which is why it is at the centre of everything we do.

What are the next steps?

If you would like to see our Graphical Charting module working in action, or just want to know more about PatientSource, we would be happy to organise a short demo with one of our product specialists. If you are viewing this document online, you can contact us by clicking **HERE** or alternatively visit our website to contact us and a member of our team will be in touch.
