ePrescribing

PatientSource explained

Who are we?

PatientSource is a cloud based EPR solution, created by clinicians, for clinicians. Our interoperable system plugs seamlessly in to your existing processes and moves paper medical records in to a digital hub, drastically reducing human error and improving patient care. What makes us different from other solutions I hear you ask? Our modular based approach to building EPR software and our innovative partnership programme allows us to build a solution that's totally bespoke to your needs.

What is the module?

ePrescribing allows users to prescribe, issue and track medication for both their inpatients and outpatients in a straightforward and intuitive way.

Benefits and Key Features

- Familiar layout: looks like a paper drug chart
- Clinical Decision Support in prescribing: prescriptions checked for safety and interactions
- Supports once-only, regular, PRN as required, fluid infusions, variable dose medications, medical gases
- Dual-signing for controlled drugs / infusions / high risk medications
- Outpatient prescribing & dispensing
- Pharmacist review (sign off, stoppage, substitution, supplementary information)
- Customisable local formulary
 with stock management

It is imperative to make sure that you have the necessary infrastructure to limit mistakes and maximise efficiency."

Why – Why should you care? Why go with PS?

Integrated support with drugs databases allows for intelligent checking and alerting of prescriptions to reduce chances of errors.The adjustable warning threshold also guards against alarm fatigue. At such a pivotal point in a patients journey it is imperative to make sure that you have the necessary infrastructure to limit mistakes and maximise efficiency.

An Agile and Interoperable Solution

Because our solution is modular and cloud based, we provide the flexibility to fit straight in to your clinic or hospital either as a departmental system or a greenfield solution that replaces your paper based processes. Implementation is easy, taking as little as four weeks to be up and running from inception. Interoperability is the future of digital healthcare, which is why it is at the centre of everything we do.

Patient care safely in one place | patientsource.co.uk

Implementation is easy, taking as little as 4 weeks to be up and running from inception.

What are the next steps - Link to hubspot form or email

If you would like to see our ePrescribing module working in action, or just want to know more about PatientSource, we would be happy to organise a short demo with one of our product specialists. If you are viewing this document online, you can contact us by clicking **HERE** or alternatively visit our website to contact us and a member of our team will be in touch.

"Because our solution is modular and cloud based, we provide the flexibility to fit straight in to your clinic or hospital either as a departmental system or a greenfield solution that replaces your paper based processes."
